Dear Sir or Madam,

Having recently graduated from ENSEEIHT with a degree in Electronics, Electrical Energy and Automation (3EA), I am applying for your Electrical Network Engineer position. I am particularly interested in this opportunity, as the profile described in your job advertisement closely matches my skills and experience.

My background has enabled me to develop strong technical expertise in electrical distribution networks. Through my work in project preparation, I have strengthened my skills in technical file analysis, worksite planning, and coordination of both internal and external field teams, which aligns well with the requirements outlined in your job posting.

A team-oriented and conscientious individual, I am able to adapt quickly to existing work environments and would integrate smoothly into your team.

I remain at your disposal for any additional information and would be pleased to discuss my application further during an interview.

Yours faithfully,
